## Loader Alert System Would have Prevented this Incident

## Model DMS-A Dock Watch with Loader Alert System

### Dock –Watch:

- **Dock Watch:** Mounted in your loading dock bumper. Dock Watch alerts loaders of unsafe conditions between the loading dock and trailer.
- **24/7 Trailer to Dock Safety:** Dock Watch measures the distance between the trailer and the dock constantly, it alarms if an unsafe condition arises which alerts the loader.
- **110 db Audible Alarm:** Sounds when “Trailer Creep” or an “Early Departure” has occurred and created an unsafe condition at the dock door.
- **Alarm Light:** Red indicator light on inside box that comes on when an alarm sounds. Red light indicates that the load/unload process needs to **STOP** because of an unsafe condition
- **Audible Alarm Cancel Button:** Button will silence the 110 db alarm, but unsafe condition exist until the trailer has been repositioned at the dock for the system to reset.
