Equip Your Loading Docks with A Truck Driver Call System (TDCS) Save Valuable Loading Time:

- **Driver Call Unit:** Activated by your loader or shipping office personnel, this unit will summon each truck driver to the shipping office or loading dock.
- **24/7 Call System:** Summon over the road truck drivers at a touch of a button.
- **Improve Loader Safety:** Keep your loader operators in the building, off of the loading ramps and out from in front of the eighteen (18) wheelers.
- **Increase Loader Productivity:** Using the Truck Driver Call System, loaders will no longer have to stop and find the truck driver.
- **Pager:** This vibrating-beeping communicator with LED light remains on the charger until needed. Handing the communicator to the over the road truck driver will allow you to quickly summon the truck driver at the push of a button.
(120 volt receptacle required)
- **Simple Operation:** Once the load is ready, Activate the load ready button will summon the truck driver.
- **Easily Installed:** Install a loader call control unit next to each loading dock. Mounting the unit takes only minutes. (110 volt electrical supply required, unit is equipped with a 6 foot (**type cord**) power cord.
- **Affordable Cost:** Call for pricing
